

NOW AVAILABLE!

RAILING FOOT SUPPORT

Always right on the mark!®

- Compatible with almost any PVC railing system
- May be added AFTER the railing has been installed allowing placement in the center of each section, or as needed, without worry of having routed holes at the proper location
- Adjusts on the job site with one simple cut (chop saw preferred) to accommodate up to 4" floor to bottom rail spacing
- All pieces to complete the rail foot support assembly are packaged in one bag including a stainless steel screw with painted head
- 1-3/8" square picket is cut to length, slid over the support, inserted into place, and attached to the railing with screw
