FABRICATION GUIDELINES

Homeland offers 3 levels of Fence Colors:

LIGHT: White, Tan

MEDIUM: Sand, Adobe, Aspen Latte, Gray

DARK: Dark Gray, Chai Gray, Ash Gray, Green Teak, Mocha Walnut, Honey Maple

These guidelines are for all levels of fence colors, with additional guidelines added for Medium and Dark colors at the end.

Homeland Vinyl Products does not warranty bowing of pickets. Please make sure of proper installation to reduce all of the factors mentioned.

- Make sure rail ends have at least 1 inch clearance of each other when inserted into posts for 6' spans, and at least 1.5 inch clearance on 8' spans. This will allow for adequate expansion and contraction of rails within the posts and prevent bowing.

- Make sure pickets are cut for adequate clearance within the rail pocket to allow for thermal expansion. If the pickets are binding against the rail, they will cause excessive bowing with thermal expansion.

- When dealing with installation on slopes, ensure that there is adequate clearance for pickets inside of the rail and cut picket at a slight angle if necessary.

9. Do not put dirt or mulch against rails. It could cause rails to permanently bow out.

In addition to guidelines 1-9, please consider the following information regarding HVP Medium and Dark colored products:

10. Medium Colors:

- For Horizontal installations, HVP approved metal picket stiffeners must be used to reduce T&G bowing.

11. Dark Colors:

Scratches will be more evident in darker colors. Use caution when transporting and installing the products. HVP approved metal stiffeners must be used in all rails.

- For Vertical installations, Midrail or HVP approved metal picket stiffeners must be used to reduce T&G bowing.

- For Horizontal installations, HVP approved metal picket stiffeners must be used to reduce T&G bowing.

12. HVP does not recommend installing horizontal sections wider than 6' on center.

Homeland Vinyl Products does not warranty bowing of pickets. Please make sure of proper installation to reduce all of the factors mentioned.

Prior to Installation

1. Do not use any clear wrapping or shrink wrap on fence for storage or transportation. Make sure any wrap or protection of the fence or profiles does not absorb and retain heat. It will cause warping.

2. Do not store or install product next to a heat source.

3. Avoid installing the product near reflective surfaces (e.g. glass windows and glass doors), which can concentrate sunlight and heat the product.

4. Avoid installing the product on or adjacent to concrete, asphalt, or dark-colored gravel.

Installation:

5. Make sure all metal stiffeners are in the correct orientation for the rail as used.

6. Make sure all rails are notched.

7. U-channel trim must be screwed to the post to help stabilize T&G boards. Please refer to HVP Privacy Fence Installation Guide for placement

8. Product expansion and contraction is temperature dependent and will vary more in longer lengths and darker colors. Please take this into account during installation.
