SMART DESIGN. SUPERIOR CONSTRUCTION. ADVANTAGES YOU CAN HOLD ON TO.

Many building codes now require graspable secondary handrails on decking and railing projects. The Summit® line is helping contractors and their customers meet the demand, with a durable secondary handrail system that is attractive and versatile enough to meet almost any installation challenge.

Use our secondary handrails and accessories wherever you require a sturdy, reinforced design that is also virtually maintenance-free. You'll find that Summit® secondary handrails are attractive and stylish, too. With Summit®, you never sacrifice appearance for functionality.

Summit® secondary handrails and accessories are designed for commercial and residential applications where building codes require a graspable handrail or applications for which the Americans with Disabilities Act (ADA) requires a secondary handrail. Check your local building codes to find what is required.

Our handrails are designed and manufactured to meet or exceed code requirements*. Our PVC handrail is available in several colors and is reinforced with a strong aluminum insert. The system installs quickly and easily with connections that are nearly seamless. Durable die-cast brackets provide an elegant look.

Primary Accessories

ACCESSORIES THAT MAKE ASSEMBLY SIMPLE.

Whether it's a simple stair railing project or a continuous graspable railing application, Summit® secondary handrails come with the accessories and options that make construction easy and efficient. We offer a selection of angle connectors as well as an adjustable joiner that can be cut to accommodate any angle on the job. To terminate the graspable handrail at a post use the 90 degree post return. To extend past the end post and then terminate back to it, use the 180 degree post return.

Combine easy-to-use accessories with attractive styling, unrivaled quality, strength and durability, and one thing is clear: the Summit® product line is the industry's finest.

Additional Accessories

Summit® parts are designed with both the contractor and homeowner in mind. They are aesthetically pleasing, easy to install, and code compliant*. We have parts for almost any application. Be sure to check out our Summit® railing brackets.
